All-in-One Health Benefits. A majority of NaturLock Aloe Vera has a Dalton weight of 1,000,000 to 2,000,000 for “immune support.” When it comes to polysaccharide chains, size matters. This is because each polysaccharide size range not only contains the traits and health benefits associated with that particular weight range, it also includes the benefits associated with each weight range below it. The four polysaccharide chain size categories below lists the health benefits that accumulate from the SMALL to VERY LARGE:

1. SMALL (Under 50,000 Daltons) 12 - 14% is absorbed and may aid in:
 - DIABETES (Type 1 and Type 2) - reduces blood sugar levels in human as well as animal studies, even in the absence of insulin.
 - ANTI-INFLAMMATORY
 - ARTHRITIS
 - COLITIS - may protect against or reverse these serious inflammations of joint linings and the colon.
2. MEDIUM 50,000 - 150,000 Daltons that may aid in:
 - ANTI OXIDANT - Have very potent anti oxidant properties but, unlike drugs, do not interfere with normal functions of cells and
 - ALL OF THE BENEFITS ASSOCIATED WITH SMALL POLYSACCHARIDES
3. LARGE 150,000 - 1,000,000 Daltons that may aid in:
 - ANTI BACTERIAL
 - HEALING PROPERTIES and
 - ALL OF THE BENEFITS ASSOCIATED WITH SMALL AND MEDIUM POLYSACCHARIDES
4. VERY LARGE > 1,000,000 Daltons 4 - 5 % are absorbed and may aid in:
 - SUPPORT / IMPROVE IMMUNE SYSTEM FUNCTION and
 - ALL OF THE BENEFITS ASSOCIATED WITH SMALL, MEDIUM AND LARGE POLYSACCHARIDES

*The above according to the IASC.

Better than ANY other Aloe Concentrate - Guaranteed

Other aloe concentrate suppliers will ONLY guarantee polysaccharides in the medium weight ranges thereby missing the larger chains that benefit the immune system, help fight bacteria, and help promote healing. This revolutionary new powder product is manufactured using a specially designed proprietary process unlike spray or freeze drying. It prevents the breakdown of long chain polysaccharides into short chain molecules and gives birth to the first Aloe Vera Powder concentrate ideally suited for nutraceutical beverages, herbal dietary supplements, tablets, and capsules.
